

How dare the NAB get involved in the manipulation of the air waves. XM is no different than cable or satellite TV. We choose to participate in receiving XM signal by our monthly service charge. This is not forced upon us. It is by choice. The NAB can not step in to interrupt this service any more than broadcast TV can interrupt cable or satellite TV. I believe that may freedom of choice will be infringed upon should the NAB have their way. I say NO to the demands of the NAB.
